

20th-21st July 2009 ~ Hilton on the Park, Melbourne

<http://www.futurecitytransport.com.au>

Following on from the success of the inaugural summit in Sydney in 2008 in Sydney, which analysed the concept of holistic transport planning, Future City Transport Summit 2009 will showcase the latest thinking in **sustainable city transport planning, urban design, public transport investment, integrated ticketing and congestion solutions.**

This second annual event will once again bring together government departments, public transport operators, finance experts and engineering companies to discuss the nation's biggest urban transport issues today and in the future.

What is on the agenda for 2009?

- The best public transport outcomes for Australia
- Strategies to cope with a population explosion
- Government perspectives on the future of transport in our major cities
- Industry case studies
- Ensuring the environmental sustainability of our cities
- Changes in public transport usage
- Planning priorities for the future
- Integrated ticketing
- Outlook for the future of Australia's passenger rail
- Tackling urban congestion

Some of the confirmed speakers include:

- Jonathan Metcalfe, Executive Chairman, **Connex Melbourne**
- Alan Tesch, Director-General, **Department of Main Roads Queensland**
- Michael Somerville-Brown, Manager of Infrastructure Assets-SmartRider Project, **Public Transport Authority of Western Australia (PTAWA)**
- Professor Graham Currie, Chair of Public Transport, Institute of Transport Studies, **Monash University**
- Elliot Fishman, Director, **Institute for Sensible Transport**
